BSCS Graduate

ABOUT ME

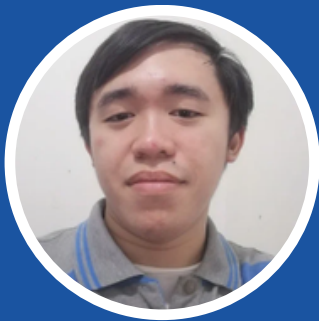

Graduated from Ateneo de Davao University, with a bachelor’s degree of Science in Computer Science. Experienced with software development, mostly in web and mobile platform. Capable of quickly learning new skills under the right circumstances.

WORK EXPERIENCE

- Intern (Full-Stack Software Developer) | May - June 2025
InfinityHub Digital Marketing
 - One month dedicated OJT Training as part of our CS curriculum.
 - Worked as a full-time Full-Stack Developer in the ManPro Project – a dedicated employee management system worked on by the InfinityHub Digital Marketing.
 - Gained insight about project management, team coordination, and communication skills during the experience, with a bit of technical skills such as git management and software debugging/troubleshooting.
 - Also got to experience applying the software development cycle in a production-deployed system

ACADEMIC PROJECTS

- POS System
Tools: Netbeans, Java, MySQL
 - OOP Project implemented using Java and MySQL.
 - Handled with frontend and backend logic, debugging, design, etc.
 - GitHub: <https://github.com/SyBorg00/AgawinPOS>
- Employee Management Web System
Tools: VSCode, Java, EJS, Node.js, Javascript
 - Event-Driven Programming Project, implemented using JavaScript, Node.js, MySQL, and EJS
 - Handled most of the aspects, logic and design of the application.
 - GitHub: <https://github.com/SyBorg00/Employee-WebApp>

ACADEMIC PROJECTS (CONT.)

Pacita Boarding Rental Mobile Application

Tools: Kotlin, Android Studio, Firebase

- Software Engineering Project, alongside with other members, implemented using Kotlin and Firebase
- Handled with the design and logical process of the application, as well as coordination with my groupmates
- Did most of the troubleshooting of the application
- GitHub: https://github.com/SyBorg00/pacita_boarding_rental_app

Univents Administrator Side Web System

Tools: Flutter, Supabase, VS Code, BLOC

- CS Elective 1 Project, implemented using Flutter, Dart and Supabase
- Handled most aspect of the project (design, workflow, tools, etc)
- GitHub: https://github.com/SyBorg00/Univent_Admin_Web

Badminton Event Management Application

Tools: Flutter, Dart, VS Code

- CS Elective 2 Project, implemented using Flutter and Dart
- Handled the backend and frontend development of the project
- GitHub: https://github.com/SyBorg00/badminton_app

Pomelo Disease Classssfication Mobile Application

Tools: React Native, Python, Docker, VS Code

- CS Thesis Project, alongside with other members, implemented using Python, React Native and Docker
- Handled mostly the frontend operation of the application, while also troubleshooting some of the backend logic of the application
- GitHub: <https://github.com/SpectralQuill/pomelo-disease-classification>

Temperature-gas-Humidity Sensor Web Monitoring

Tools: React, VS Code, Arduino, ESP32

- Architecture and Organization Project, implemented using React, Arduino, and a physical ESP32 DevKit V1
- Handled most aspect of the project, including troubleshooting between hardware and software processes.

GitHub: <https://github.com/SyBorg00/gas-temp-humidity-sensor>

AWARDS AND CERTIFICATIONS

Certification of Completion (2025)

- InfinityHub Digital Marketing

Diploma (2026)

- Ateneo de Davao University

Latin Honors: Cum Laude (2026)

- Ateneo de Davao University

Certification of Completion (2025)

- CCNA: Introduction to Networks (Cisco Networking Academy)

Certification of Completion (2025)

- Networking Security (Cisco Networking Academy)

Certification of Completion (2026)

- CyberOps Associate (Cisco Networking Academy)
